936 Dalton Avenue
Cincinnati, OH 45203
Telephone: 513.554.4944

Professional History

- Ethicon Endo-Surgery, a division of Johnson & Johnson companies
- Nypro Corporation
- Unimark/Jarden
- General Motors

Education

- M.S., Manufacturing Management, General Motors Institute
- B.S., Mechanical Engineering, Michigan State University

Certification

- Project Management Professional
- J&J Blackbelt Process Excellence

As Senior Principal Development Engineer with Ethicon Endo-Surgery, Dennis oversees manufacturing processes, continuous improvement initiatives, and project scheduling. He helped the company achieve major savings by modifying assembly procedures to be less labor-intensive. He also spearheaded the introduction of more than 100 components for projects that generate more than \$1 billion in annual revenue. Earlier in his career, Dennis was employed by Nypro Corporation, where he was the Engineering Program Manager. Dennis' skill sets include change management, manufacturing processes, manufacturing design, vendor relationships, team building, performance development, and project management. He also has conducted several internal & external training sessions for new team members and suppliers.

Volunteering is such an innate part of Dennis's DNA that Johnson and Johnson recognized him as a Volunteer of the Year. He is a founding member of the Cincinnati Toolbank and a former loaned executive to the United Way annual campaign. He has organized more than 200 volunteer events in the Greater Cincinnati area and participated in a mission trip to Belize.

OneSource Experience

As a new volunteer, Dennis looks forward to assisting with leadership development training and with special events.
