Executive Summary

The Human Services Chamber of Hamilton County, Leadership Council for Nonprofits, and OneSource Center for Nonprofit Excellence are three organizations that work to increase the impact of member nonprofit organizations in the Cincinnati Metropolitan Statistical Area (MSA).¹ While each of these organizations share a common goal of improving the efficacy of nonprofit organizations in the Cincinnati MSA, each organization does so by providing a unique set of services to their respective member organizations:

- Founded in 2013, the Human Services Chamber of Hamilton County specializes in the development and advocacy of policies that provide equitable opportunities for all community members to reach their full potential;²
- Founded in 1977, the Leadership Council for Nonprofits works to provide resources to its member organizations such as leadership development programs, training, cost savings, and networking opportunities;³ and
- Executive Service Corp of Cincinnati (founded in 1995) and ReSource (founded in 1986) merged in 2017 to form OneSource Center for Nonprofit Excellence, which serves more than 300 nonprofit organizations through consulting, training, coaching, savings, and connections to its members.⁴

The Human Services Chamber of Hamilton County engaged the Economic Center to study the economic and fiscal impacts of the Leadership Council for Nonprofits, OneSource Center, itself, and each organizations' members on the Cincinnati MSA. The economic impacts of these organizations are aggregated and disaggregated by industry and county to show the overall and detailed impacts that those organizations have had. Similarly, the fiscal impacts of these organizations have been aggregated and disaggregated by municipality, county, and state in order to clearly illustrate what fiscal impacts have occurred as well as to what jurisdiction.

The Economics Center collected information from IRS Form 990s, unemployment insurance data, and a fielded a survey to create a database of 312 nonprofit organizations. During fiscal year 2022, the Human Services Chamber of Hamilton County, the Leadership Council for Nonprofits, OneSource Center, and member organizations:

- Provided \$1.4 billion of direct economic output and directly employed 24,003 individuals who earned wages of \$751.4 million;
- Sustained an additional \$1.5 billion of indirect economic output through which 17,020 additional individuals were employed with wages totaling \$586.0 million; which
- Created a total of \$2.9 billion in economic output, which supported 41,023 jobs with \$1.3 billion in total wages; and
- Generated \$87.1 million in earnings and sales tax revenue at the state, county, and municipal levels.

¹ A Metropolitan Statistical Area (MSA) is an area comprised of different communities with close economic ties to one another. The Cincinnati MSA encompasses five counties in Ohio: Brown, Butler, Clermont, Hamilton, and Warren; seven counties in Kentucky: Boone, Bracken, Campbell, Gallatin, Grant, Kenton, and Pendleton; and four counties in Indiana: Dearborn, Franklin, Ohio, and Union.

Introduction

Formed in 2013, the Human Services Chamber of Hamilton County is a coalition of human services organizations in Hamilton County, Ohio. The mission of the Human Services Chamber is to develop and advocate for policies that provide equitable opportunities for all community members to reach their full potential. The Human Services Chamber represents over 70 human services organizations that provide essential services such as job training; housing; mental health services; addiction treatment; and supportive services for children, seniors, and persons with disabilities.⁵

Founded in 1977, the Leadership Council for Nonprofits is a network of approximately 250 nonprofit organizations in Greater Cincinnati, Northern Kentucky, and Southwest Indiana. The Leadership Council supports its members by offering leadership development programs, training, cost savings, and networking opportunities in an effort to maximize the impact of nonprofit organization, to develop their leaders, and to strengthen the community.⁶

Executive Service Corp of Cincinnati (founded in 1995) and ReSource (founded in 1986) merged in 2017 to form OneSource Center for Nonprofit Excellence, which serves more than 300 nonprofit organizations. OneSource Center is a nonprofit resource center that provides consulting, training, and coaching services; assists nonprofits stretch every dollar through its furniture bank of donated office furniture and marketplace of surplus household items; and connects nonprofits to professional services.⁷

The Human Services Chamber of Hamilton County engaged the Economics Center to examine the economic and fiscal impact of nonprofit organizations in the Cincinnati Metropolitan Statistical Area (Cincinnati MSA).⁸ Economic impacts represent the expenditures, jobs, and wages supported by nonprofit organizations in the Cincinnati MSA, while the fiscal impacts represent the earnings and sales tax revenue generated for state and local jurisdictions. Economic impacts are presented in the aggregate as well as disaggregated by industry and county. The nonprofit organizations included in this analysis are listed in the Appendix.

Methodology

Economic Impact

An economic impact analysis measures the effect of an organization or industry's expenditures or sales on its surrounding community. The total economic impact is the sum of the direct and indirect impacts. For this analysis, the direct impact refers to the expenditures, jobs, and wages supported by nonprofit organizations in Cincinnati MSA. The indirect impact is the additional economic impact resulting from the increased demand, income, and jobs within other industries, or the inter-industry linkages. The direct impact has ripple effects due to increased household income and spending, which are referred to as induced impacts. Induced impacts are reported within indirect impacts for the entirety of this report.

The Economics Center utilized IRS Form 990s to identify the operations expenditures, jobs, and wages of nonprofit organization in the Cincinnati MSA. If an IRS Form 990 was unavailable, nonprofit organizations were matched to unemployment insurance data obtained from the Ohio Department of Job and Family Services, through a formal data sharing agreement, to identify the industry, jobs, and

⁵ ("Human Services Chamber – The Collective Voice of Human Services in the Cincinnati Region," n.d.)

⁶ ("Leadership Council | About," n.d.)

⁷ ("About Us - Onesource," n.d.)

⁸ The Cincinnati Metropolitan Statistical Area consists of 15 counties in the States of Ohio, Kentucky, and Indiana. In Ohio, the included counties are Brown, Butler, Clermont, Hamilton, and Warren. In Indiana, the MSA includes the counties of Ohio, Dearborn, and Franklin. In Kentucky, the included counties are Boone, Bracken, Campbell, Gallatin, Grant, Kenton, and Pendleton.

wages for nonprofit organizations operating in Ohio. Additionally, the Economics Center constructed and distributed a survey to nonprofit organizations in the Cincinnati MSA to collect pertinent data such as expenditures, employment, wages, and industry. Where necessary, the Economics Center supplemented employment and wage data using industry-specific data for Cincinnati MSA.

Expenditure data were factored for economic leakage to represent only the economic impact of money retained in the Cincinnati MSA. Economic leakage refers to the percentage of purchases for products and services that cannot be met immediately within the local economy, and thus must be imported from outside the local economy. Leakage estimates were obtained from Lightcast, a third-party provider of labor market data.

The direct impacts of nonprofit organizations in Cincinnati MSA were used in an input-output model that uses multipliers to represent the inter-industry linkages and household economic relationships. Multipliers are used to determine the total economic impact when applied to the direct impact. This means that multipliers reflect how many additional dollars will be spent in a local economy by other businesses and households for every dollar spent by an organization or industry. These multipliers are location and industry specific and were obtained from the Regional Industrial Multiplier System (RIMS) created by the U.S. Bureau of Economic Analysis.

Fiscal Impact

The fiscal impact analysis estimates the subsequent impact of nonprofit organizations in Cincinnati MSA on state and local tax revenue. State and local earnings tax revenue were calculated for the wages, directly and indirectly, supported, as well as the state and local sales tax revenue resulting from the spending of those wages.

State earnings tax revenue accrues to the state of residence of the worker, whereas local earnings tax revenue accrues to the jurisdiction of the workplace. The Economics Center retrieved commuting patterns for each county in the Cincinnati MSA from Lightcast. The applicable county distribution of the state of residence of workers was applied to the direct jobs supported by nonprofit organizations. For the indirect jobs supported, the overall distribution of the state of residence for employed workers in the Cincinnati MSA was retrieved from the U.S. Census Bureau. The applicable state earnings tax rates were then applied to the average wages per direct and indirect job supported based on share of residence by state.

The applicable local earnings tax rates were applied to the direct wages supported by nonprofit organizations based on the location of each organization. The Economics Center assumed that workers indirectly supported by nonprofit organizations followed the same distribution of the county and municipality of work as all employed workers 16 years of age and older in Cincinnati MSA, based on data retrieved from the U.S. Census Bureau. A weighted local earnings tax rate for local jurisdictions in each state was calculated using the municipality and county of employment for employed workers 16 years of age and older in Cincinnati MSA. The weighted local earnings tax rates for each state were then applied to the average wages per indirect job supported.

Sales tax revenue accrues to the State of Ohio, the Commonwealth of Kentucky, and the State of Indiana as well as to local jurisdictions in the Cincinnati MSA. The Economics Center assumed that the individuals, directly and indirectly, supported by nonprofit organizations spend their wages in the local economy. To estimate the sales tax revenue generated, the Bureau of Labor Statistics' Consumer Expenditure Survey for the Midwest was utilized to determine what portion of average annual wages were used to make taxable purchases. Taxable spending was then factored for economic leakage, and a weighted sales tax rate was applied. State sales tax rates were applied to the portion of taxable

spending estimated to occur in the State of Ohio, Commonwealth of Kentucky, and the State of Indiana. The weighted county sales tax rate was calculated based on the county of retail sales as well as food and beverage sales within counties in Ohio.

Economic Impact

The Economics Center collected and used information from IRS Form 990s, unemployment insurance data from the State of Ohio, and fielded a survey to create a database of 312 nonprofit organizations in the Cincinnati MSA. As shown in Table 1, the nonprofit organizations directly produced \$1.4 billion in economic output during fiscal year 2022. These nonprofits directly employed 24,003 individuals with wages that totaled more than \$751.4 million. These nonprofits also indirectly sustained \$1.5 billion worth of economic output and indirectly supported an additional 17,020 jobs with \$586.0 million in wages. In total, the organizations included in this economic impact analysis contributed \$2.9 billion in total economic output and supported 41,023 total jobs with more than \$1.3 billion in wages in the Cincinnati MSA in fiscal year 2022.

Table 1: Total Economic Impact of Member Organizations in the Cincinnati MSA, FY 2022 (2022\$)

Impact Type	Output	Jobs	Wages
Direct	\$1,431,937,889	24,003	\$751,419,033
Indirect	\$1,452,829,956	17,020	\$586,023,178

Disaggregation by Industry

The nonprofit organizations examined by the Economics Center in this analysis produced \$1.4 billion in direct economic output, 24,003 direct jobs, and \$751.4 million in direct wages, as detailed in Table 2. Of the 312 nonprofits in this analysis, approximately half (50.3%) were in the Health Care and Social Assistance industry. Of the economic output, jobs, and wages directly produced by the analyzed nonprofits, 51.3 percent of the direct economic output, 60.6 percent of the direct jobs, and 57.2 percent of the direct wages were attributable to the Health Care and Social Assistance industry.

Table 2: Direct Economic Impact of Member Organizations in the Cincinnati MSA by Industry, FY 2022 (2022\$)

NAICS Code	Industry	Number of Nonprofits	Direct Output	Direct Jobs	Direct Wages
54	Professional, Scientific, and Technical Services	10	\$12,528,825	223	\$10,260,641
61	Educational Services	24	\$41,203,040	911	\$20,245,238
62	Health Care and Social Assistance	157	\$734,736,350	14,550	\$430,132,719
71	Arts, Entertainment, and Recreation	20	\$110,091,628	2,672	\$63,437,554
81	Other Services (except Public Administration)	91	\$290,766,152	3,945	\$99,995,398
	Other	10	\$242,611,894	1,702	\$127,347,483
	Total	312	\$1,431,937,889	24,003	\$751,419,033

Source: Economics Center analysis.

Table 3 details the share of jobs and wages directly supported by nonprofit organizations included in this analysis relative to the total jobs and wages in the Cincinnati MSA. Overall, nonprofit organizations represented 1.6 percent of the total jobs and 0.9 percent of the total wages in the Cincinnati MSA in fiscal year 2022. Specifically, nonprofit organizations in the Health Care and Social Assistance industry supported 8.4 percent of the industry's jobs and 4.0 percent of the industry's wages. Nonprofit organizations in the Arts, Entertainment, and Recreation supported 6.9 percent of the industry's jobs and 4.5 percent of the industry's wages. Additionally, the Other Services industry supported 5.3 percent of the industry's jobs and 3.8 percent of the industry's wages. These three industries represented the industries with the highest share of jobs and wages comprised of nonprofit organizations.

Table 3: Share of Direct Jobs and Wages of Member Organizations Relative to All Businesses in the Cincinnati MSA by Industry, FY 2022 (2022\$)

NAICS Code	Industry	Share of Jobs	Share of Wages
54	Professional, Scientific, and Technical Services	0.2%	0.1%
61	Educational Services	3.4%	2.6%
62	Health Care and Social Assistance	8.4%	4.0%
71	Arts, Entertainment, and Recreation	6.9%	4.5%

	Other	0.2%	0.2%
	Total	1.6%	0.9%

Source: Economics Center analysis.

As shown in Table 4, the 312 nonprofit organizations included in this analysis indirectly supported approximately \$1.5 billion in economic output and supported 17,020 jobs with \$586.0 million in wages during fiscal year 2022. Of the economic output, jobs, and wages indirectly generated by the analyzed nonprofit organizations, 54.3 percent of the indirect economic output, 56.1 percent of the indirect jobs, and 57.4 percent of the indirect wages sustained were attributed to the Health Care and Social Assistance industry.

	Total	312	\$1,452,829,956	17,020	\$586,023,178

Source: Economics Center analysis.

As presented in Table 5, nonprofit organizations included in this analysis created approximately \$2.9 billion in total economic output and supported 41,023 total jobs with more than \$1.3 billion in total wages. Of the 312 nonprofits in this analysis, 50.3 percent were in the Health Care and Social Assistance industry. Approximately 52.8 percent of the total economic output, 58.7 percent of the total jobs, and 57.3 percent of the total wages sustained were attributable to organizations in the Health Care and Social Assistance industry.

Table 5: Total Economic Impact of Member Organizations in the Cincinnati MSA by Industry, FY 2022 (2022\$)

Disaggregation by County

As detailed in Table 6, the 312 nonprofits the Economic Center examined in this analysis directly produced \$1.4 billion in economic output, which supported 24,003 jobs, and \$751.4 million in wages for the Cincinnati MSA. The organizations included in this analysis located in Hamilton County were

responsible for generating the majority of the direct economic impact. The 250 organizations in Hamilton County created nearly \$1.3 billion in direct economic output and supported 19,475 direct jobs with more than \$649.3 million in direct wages.

Table 6: Direct Economic Impact of Member Organizations in the Cincinnati MSA by County, FY 2022 (2022\$)

County and State	Number of Nonprofits	Direct Output	Direct Jobs	Direct Wages
Hamilton County, OH	250	\$1,279,473,570	19,475	\$649,282,549
Kenton County, KY	13	\$44,667,015	1,267	\$33,890,994
Butler County, OH	13	\$6,234,351	191	\$4,295,282

Total	312	\$1,431,937,889	24,003	\$751,419,033

Source: Economics Center analysis.

The organizations included in this analysis indirectly sustained \$1.5 billion in economic output and indirectly supported 17,020 jobs with \$586.0 million in wages for the Cincinnati MSA, as shown in Table 7. Of the 312 nonprofits, 250 were located in Hamilton County, Ohio and accounted approximately \$1.3 billion in indirect economic output, 14,213 indirect jobs, and \$506.1 million in indirect wages produced throughout the Cincinnati MSA during fiscal year 2022.

Table 7: Indirect Economic Impact of Member Organizations in the Cincinnati MSA by County, FY 2022 (2022\$)

County and State	Number of Nonprofits	Indirect Output	Indirect Jobs	Indirect Wages
Hamilton County, OH	250	\$1,296,133,329	14,213	\$506,053,407

Fiscal Impact

In addition to quantifying the economic impact of nonprofit organizations in the Cincinnati MSA, the Economics Center also calculated the subsequent fiscal impacts in the form of earnings and sales tax revenue for state and local jurisdictions. The wages supported by the nonprofit organizations included in this analysis generated a total of \$55.0 million in earnings tax revenue for state and local jurisdictions in fiscal year 2022. The State of Ohio received approximately \$38.9 million in earnings tax revenue, while the Commonwealth of Kentucky and the State of Indiana collected \$14.2 million and \$1.9 million in earnings tax revenue, respectively.

The spending of the wages supported by the nonprofit organizations included in this analysis resulted in approximately \$32.1 million in sales tax revenue for state and county governments. Approximately \$21.6 million in sales tax revenue was generated for the State of Ohio, while the Commonwealth of Kentucky received more than \$5.4 million and nearly \$1.0 million accrued to the State of Indiana. Ohio counties in the Cincinnati MSA received nearly \$4.2 million in sales tax revenue due to the spending of the wages earned by individuals directly and indirectly supported by the 312 organizations included in this analysis.

As detailed in Table 9, the 312 nonprofits the Economic Center examined in this analysis were responsible for creating a total of approximately \$87.1 million in earnings and sales tax revenue for state and local government entities during fiscal year 2022. Approximately \$64.6 million in earnings and sales tax revenue, or nearly three-quarters of the total fiscal impact, accrued to the State of Ohio or counties and municipalities within the State. The Commonwealth of Kentucky and its local jurisdictions in the Cincinnati MSA benefitted from approximately \$19.6 million in earnings and sales tax revenue, while the State of Indiana and its local jurisdictions in the Cincinnati MSA received more than \$2.8 million in earnings and sales tax revenue.

Table 9: Total Fiscal Impact of Member Organizations, FY 2022 (2022\$)

Conclusion

At the request of the Human Services Chamber of Hamilton County, this economic analysis focused on the direct and indirect economic output, jobs, and wages contributed by the operations of the Human Services Chamber of Hamilton County, the Leadership Council for Nonprofits, OneSource Center, and their respective nonprofit members in the Cincinnati MSA. The fiscal impact analysis focuses on the subsequent impact at the state, county, and municipal levels in the form of earnings tax revenue and sales tax revenue.

During fiscal year 2022, the 312 nonprofits analyzed by the Economics Center produced \$1.4 billion in direct economic output and 24,003 jobs through direct employment with \$751.4 million in wages in the Cincinnati MSA. Additionally, these organizations indirectly supported \$1.5 billion in indirect economic output with 17,020 jobs and \$586.0 million in wages. In total, the nonprofit organizations included in this analysis contributed \$2.9 billion in total economic output and supported 41,023 jobs with \$1.3 billion in total wages for the Cincinnati MSA.

The economic impact created throughout the Cincinnati MSA by the nonprofit organizations included in this analysis resulted in earnings and sales tax revenue for state and local government entities. Approximately \$55.0 million in earnings tax revenue was generated and more than \$32.1 million in sales tax revenue was created resulting in a total fiscal impact of approximately \$87.1 million during fiscal year 2022. Approximately \$64.6 million in earnings and sales tax revenue, or nearly three-quarters of the total fiscal impact, accrued to the State of Ohio. The Commonwealth of Kentucky and its local jurisdictions in the Cincinnati MSA benefitted from approximately \$19.6 million in earnings and sales tax revenue, while the State of Indiana and its local jurisdictions in the Cincinnati MSA benefitted from \$2.8 million in earnings and sales tax revenue.

About The Alpaugh Family Economics Center

The Research Division of the Alpaugh Family Economics Center provides unbiased, non-partisan economic data and analysis for non-profit organizations, government agencies, and corporate stakeholders. Our research findings enable clients to make data-driven decisions, demonstrate value to investors and communities, and inform public policy.

Project Staff

Megan Heare, Assistant Director of Research, Lead Researcher

Joseph Traynor, Research Associate

Brad Evans, Co-Executive Director and Director of Research
